

MIDTERMS SKILLS EXAM 2025

Course Code: CPE007

Program: Computer Engineering

Course Title: Programming logic and design

Date Performed: 10/9/2025

Section: CPE11S1

Date Submitted: 10/9/25

Name(s): Hanz Rhayven M. Pabalan

Instructor: Engr. Jimlord Quejado

6. Output

Pabalan Hanz Rhayven M._midterm skills exam 2025.cpp

```

7. Supplementary Activity

8. Conclusion

I learned array, pointers, struct, and I always practice but when im taking the skills exam im kind of nervous because what if I didn't make it, but in the end, I just put what I learned then make them work together, but in my total sales its kind of error because its supposed to be aligned with each other but theres no time so I need to pass this, and in the array, I know I didn't use my array very well because I can make it more shorter but I forgot how to, and my overall, I learned areays, pointers, structure.

9. Assessment Rubric
